

## Lab 2.2 - NPM Check

When Node.js is installed, the default package manager for Node is also installed.

To check run:

```
npm -v
```

This should output something like the following:

A screenshot of a terminal window with a dark background. The window title bar shows 'zsh' and a cursor icon. The terminal content shows the command '\$ npm -v' being entered, followed by the output '8.1.2'. A new prompt '\$' is visible on the next line, with a cursor character.

If the first number before the period is 6 or greater, then we are ready to proceed.
